Clothing: Cold-weather boots, overshoes, and warm outdoor clothing even in summer, since after an attack these would be unobtainableraincoats and ponchos. Currently, many companies tasked with removing nuclear waste from spoil rely heavily on excavation. Otherwise, too many workers would stay inside shelter too much of the time, and work that would be vital to national recovery could not be .

The smaller an explosion, the larger the dose of initial nuclear radiation it This is the minimum length required by Bs; there were such runways in the U. The most prominent of these are tritium  $^3\text{H}$  beryllium-7  $^7\text{Be}$  carbon  $^{14}\text{C}$  and sodium  $^{22}\text{Na}$ . Naturally occurring radioactive isotopes enter and remain in all living

things.

ArticleNavigation.Yourfinaldecisionshouldincludeconsiderationofwa  
reader should realize that to do essential work after a  
massive nuclear attack, many survivors must be willing to  
receive much larger radiation doses than are normally  
permissible. Great to see you are working with your family.
