Contraindications Contraindications. The ESMO Colloquia are innovative sessions within the Congress programme that bring together top experts to discuss evolving areas of interest to the oncology community. What monitoring methods other than imaging are recommended for prostate cancer bone metastases? Score: 99-5 Stars -- Doody's. However, with the increasingly widespread use of imaging, the lack of consensus on some topics clearly indicates the absence of strong evidence for some decisions. Who should be treated vs monitored? It has been suggested that making lifestyle changes might be effective in preventing prostate cancer. The goals are: i to indicate the appropriate application of prostate cancer therapies; ii to improve the therapeutic outcomes and safety of prostate cancer therapy; iii to reduce differences in the therapies being provided at different medical facilities; iv to do away with ineffective therapies, and thereby alleviate both human and economic burdens; and v to enhance mutual understanding between medical professionals and patients. Readers with questions regarding guideline content are directed to contact the guideline developer.
