Discussions with biostatisticians on the types of analyses to be performed will clarify which dates must be complete, which can be stored as partial dates for reference, and which can be approximated to allow some information to be extracted from. Preparing for implementation.

Small audits conducted throughout the study may identify problems with training. Any data management group, large or small, long established, or just emerging, will have to perform these tasks or be closely involved with. I found it very readable, very systematic, and full of good practical advice. In either case, the two must be kept in synchronization. More information about integration with discrepancy management systems can tie the whole process together by providing data managers easy access to and information on pages, data, and discrepancies interchangeably.
