[Feature] Light in the Donbass Window | Harper's Magazine

An anti-laser - which absorbs light rather than emitting it - has been built for the first time. A laser shines by producing a cascade of photons.

Anti-glare glasses are made with lenses that have an anti-reflective coating. If you wear glasses and regularly experience glare or light reflections, you will.

This anti-glare shield can be used with SGM's POI wash/flood lights from the series P-1, P-2, Q-2, and i It comes in a black-enamelled Oxsilian coated.
