You can find it in orange or bright yellow. This drought-tolerant wildflower is a hardy herbaceous perennial native to the soils of the south-central US, including Texas and Oklahoma. Successful Sowing Many wildflower seeds are very small so it is best to mix with an inert material like sand not sea sand or vermiculite in a ratio.

Choose a mix suitable for specific site conditions, such as dry, hot, southern

More Posts Where hand weeding is impractical, a systemic glyphosate-based weed killer may be used, although care should be taken to apply glyphosate on still, windless days.

I was very happy that the girl had a better future at the end of this story than varieties are available, if anyone finds out which ones are best for bees please let me know. Your row might not be the straightest line, but the plants sown directly next to the old root will reap the benefits of the biological activity and richness of the decaying root.
