All babies should receive newborn Craniosacral evaluations and treatments as soon as possible after birth. I conduct other gentle assessments and correct the sources of pain and dysfunction using gentle manipulative techniques. Michael Kern.

In the early days the most common difficulties with babies are related to feeding. And Children your older baby have symptoms that just have not resolved over time, like discomforts sleep issues, digestive problems? At birth the bones of the cranium are not fully formed. In addition, the craniosacral work improves your body awareness and deepens your contact with the baby inside you. The title should be at least 4 characters long. Craniosacral Therapy can be of help with Babies symptoms and it can also be a general support to help your baby or child access optimal health. A great suggestion we have for parents is to also get some CST sessions for themselves.
