Felix marked it as to-read Jul 15, Well, one thing is clear: in general, the number of births increases with the number of rabbits, and similarly for the number of deaths.

And this, because of the rarity of cycling, is typically not very far. We all know that explanation must end somewhere, and typically it ends with the laws of nature. We believe that the argument is quite weak on a number of fronts.

Thus, the maternal effect has to be present and, according to our view, will be in most cases, when such counterevidence is carefully considered, our internal forces interpretation of the evidence is as viable as the alternatives.
